COMMANDED TO "GET OUT VOTE"

Lack of Interest and Good Weather Necessitated Hard Work.

By Associated Press.
Washington, Nov. 6.—"Get out the vote" is the command from political leaders throughout the country. Lack of interest is reported throughout many sections. This condition necessitates hard work at the polls and the assurance of favorable weather in the greater portion of the country is welcomed by all contending parties. Decided uncertainty as to the result of balloting is the feature of the closing campaign news from nearly every quarter. This uncertainty was manifested in New York, Pennsylvania, Chicago and other sections by a vigorous continuance of the campaign until midnight last night.

Messrs. Hughes and Hearst continued their terrific speaking records up to the last minute.
President Roosevelt's last act in the campaign was to telegraph his son-in-law, Representative Longworth, at Cincinnati yesterday, to have portions of Secretary Root's Utica, N. Y., speech printed, that the president's desire for a republican congress might not be misunderstood in Ohio. The president left the White House at midnight for Oyster Bay, where he will vote and return to Washington, reaching here at 6:15 to-night.

William J. Bryan, who has been an active campaigner, concluded with a speech in behalf of the Fusion ticket at Plattsmouth, Neb., yesterday.

Speaker Cannon, who has averaged two speeches a day during the greater part of the campaign, is in Danville, Ill., his home.

Vice President Fairbanks as well as the majority of the members of the cabinet, all of whom have been at the stump, are at their voting residences to-day.

The number of Washington voters who have gone to their homes to-day is smaller than for a decade. The absence of railroad passes and the higher voting rate on the roads is given as a reason.

Reports from "the Solid South" indicate little interest and the necessity of stimulating the voting.

Missouri and Tennessee present interesting situations and both parties conclude the campaign with confident predictions of success.

In Montana the Socialist party makes a confident claim of increasing their vote of 6,000 last year and both the Republicans and Democrats claim the state.

The earthquake in San Francisco is said to have so redistributed the population of the state, that old estimates cannot be relied upon.

Massachusetts kept the fight warm until the last minute and Boston was a midnight battleground between Guild and Moran.

In New York City and Chicago the ballots are ponderous and with the prospect of many scratches, a long delay in arriving at results is predicted.

Philadelphia Intense.
Philadelphia, Pa., Nov. 6.—The intense interest in the election in Philadelphia had the effect of bringing out an unusually heavy vote throughout the city during the morning hours.

The weather was perfect, the temperature being high enough to permit the workers to go about without overcoats. The polls in Philadelphia as well as throughout Pennsylvania opened at 7 a. m., and will close at 7 p. m.

In West Virginia.
Charleston, W. Va., Nov. 6.—The voting here to-day was the first under the new registration law and many unregistered voters registered at the polls causing considerable delay in the polling of votes. Weather fair and warm.

Boston Has Blue Skies.
Boston, Mass., Nov. 6.—Blue skies and crisp cool weather made an ideal election day. This with the extraordinary campaign that has been waged pointed to the casting of a heavy vote throughout the state. The keen interest in the contest between Governor Guild and John B. Moran, the heads of the Republican and Democratic tickets respectively, and for Lieutenant governor between Eben

OFFICIALS OF THE L. & N. ARE HERE

President Smith and Several Directors Were Here.

President Milton H. Smith, Chairman Waters and several other members of the board of directors of the Louisville & Nashville Railroad, spent yesterday in the city, coming here for the purpose of looking over the company's property.

It was the first visit of the president and members of the directorate of the road since the disastrous hurricane of September and their object was to ascertain from personal observation some of the effects of the storm, especially to the company's waterfront property and its wharves. They arrived in the afternoon and chartering a boat spent the entire afternoon along the waterfront, leaving for Louisville at 11:05 o'clock.

There is no Reason
why your baby should be thin, and fretful during the night. Worms are the cause of this, sickly babies. It is natural that a healthy baby should be fat and sleep well. If your baby does not retain its food, don't experiment with colic cures and other medicines, but try a bottle of White's Cream Vermifuge, and you will soon see your baby have color and laugh as it should.

WALTON AGAINST DRAINAGE SCHEME

Special to The Journal.
DeFuniak Springs, Nov. 6.—This precinct of Walton county gives 47 for and 45 against drainage and three country precincts give 25 for and 67 against the proposition. There was a light vote and but little interest.

S. Draper, Republican, and E. Geary Brown, Democrat and Independence League, seemed to make the leaders of both parties optimistic.

No "Off Year" Apathy.
Providence, R. I., Nov. 6.—Perfect weather favored the state elections to-day. Besides the vigorous campaign waged by Governor George H. Utter, Republican, seeking re-election and by Mayor James S. Hignons, of Pawtucket, his Democratic opponent, the struggle for the control of the state legislature which will choose a United States senator to succeed Mr. Wetmore, was expected to arouse the voters from the usual "off year" apathy.

Light Vote in Ohio.
Columbus, Ohio, Nov. 6.—A warm day with the sun shining characterized election day here. Early reports show that there will be a light vote in the country districts.

In Georgia.
Atlanta, Ga., Nov. 6.—The weather here is clear and warm, but the prospects of a heavy vote in Atlanta and throughout the state is small.

Out in Full Strength.
Wilmington, Del., Nov. 6.—Better election day weather never was known in Delaware than that which prevailed to-day. There is little doubt that the full registered vote will be polled, but the registration is more than 3,000 short of that of two years ago.

BOARD OF WORKS HEAR TESTIMONY ABOUT CEMENT

Lengthy Sessions Yesterday and Last Night, With Architect Ausfeld Present—He Now Admits He is Under Board's Supervision.

Lengthy sessions of the Board of Public Works were held yesterday, when the alleged bad cement matter was gone into in detail, witnesses being examined and resolutions passed. Architect Ausfeld, who reached the city yesterday, was present, and admitted to the board that he was under its supervision, and together the architect and members inspected the work.

The meeting of the board was called at 11 o'clock with a full board present and lasted until nearly 1 o'clock, and was finally adjourned to 5 o'clock yesterday afternoon.

The matter which occupied the attention of the board was the cement that is being used in the construction of the new city hall and the matter was thoroughly gone into, with the result that the following resolution was passed, Mr. Daniels not voting on it:

"Whereas, The testimony before this board shows that damaged cement has been used in the construction of the foundation of the city hall, contrary to the specifications,

"Resolved, That this board does not approve of the work that has been done on said city hall, and

"Whereas, An examination of the cement shows in barrels examined to be more or less damaged by water; therefore be it

"Resolved, That this board condemn said cement as not conforming to specifications, and be it further

"Resolved, That all work performed with this cement be condemned as not conforming to specifications and contract."

Mr. Daniels explained that his reason for not voting on the resolution was because he withheld his opinion in the cement matter, pending the investigation now being made of the cement by an engineer employed for that purpose.

Ausfeld Present.
Architect Ausfeld was called before the board and upon being asked if he recognized that body's supervision over him, answered that he did, and he was then cross-examined in detail in regard to the city hall work.

Mr. Ausfeld stated that in his opinion, and judging from the character of the work done, no damaged cement had been used, and invited the members to the grounds to make an inspection which was done.

The work was tested in a number of places and found apparently in proper form, but an inspection in the warehouse where the cement is stored revealed the fact that there are about 200 barrels of cement among the lot in apparently very bad condition. Some of the barrels were found to be in good condition, while others were found to be as hard as rock throughout. Others, however, were found to be only partly damaged, that is, part of the contents of the barrel had been set, and the remainder, which was still soft, was being used, after being sifted, in making the concrete for the foundation of the new city hall.

When asked in regard to the undamaged portion of such a barrel of cement, Mr. Ausfeld said that in his opinion, this cement was all right and was making good concrete.

The Blount Building.
When asked about the cement he had rejected on the Blount building, he gave as his reason that the cement he had rejected on that job was too coarse, and that it would take too much time to sift it, and that the cement that had been used on the city hall was better.

The mayor stated that the specifications were that the cement was to be dry; that it was to be properly housed; free from set and fresh, and that in his opinion the cement used did not come up in any of these things to the specifications, and was in favor of condemning every barrel on the ground and likewise all that was already put in the foundation.

This would have necessitated the digging up of all the foundation and the matter was not acted on. Lengthy discussions followed and it was finally agreed to adjourn until 5 o'clock in the afternoon in order to call a
